

Lab 6 – My Solutions

1: Installation of Internet Information Services

PowerShell: `Get-Service W3SVC`

The screenshot shows a Windows PowerShell window titled "Administrator: Windows PowerShell". The window contains the following text:

```
Windows PowerShell
Copyright (C) Microsoft Corporation. All rights reserved.

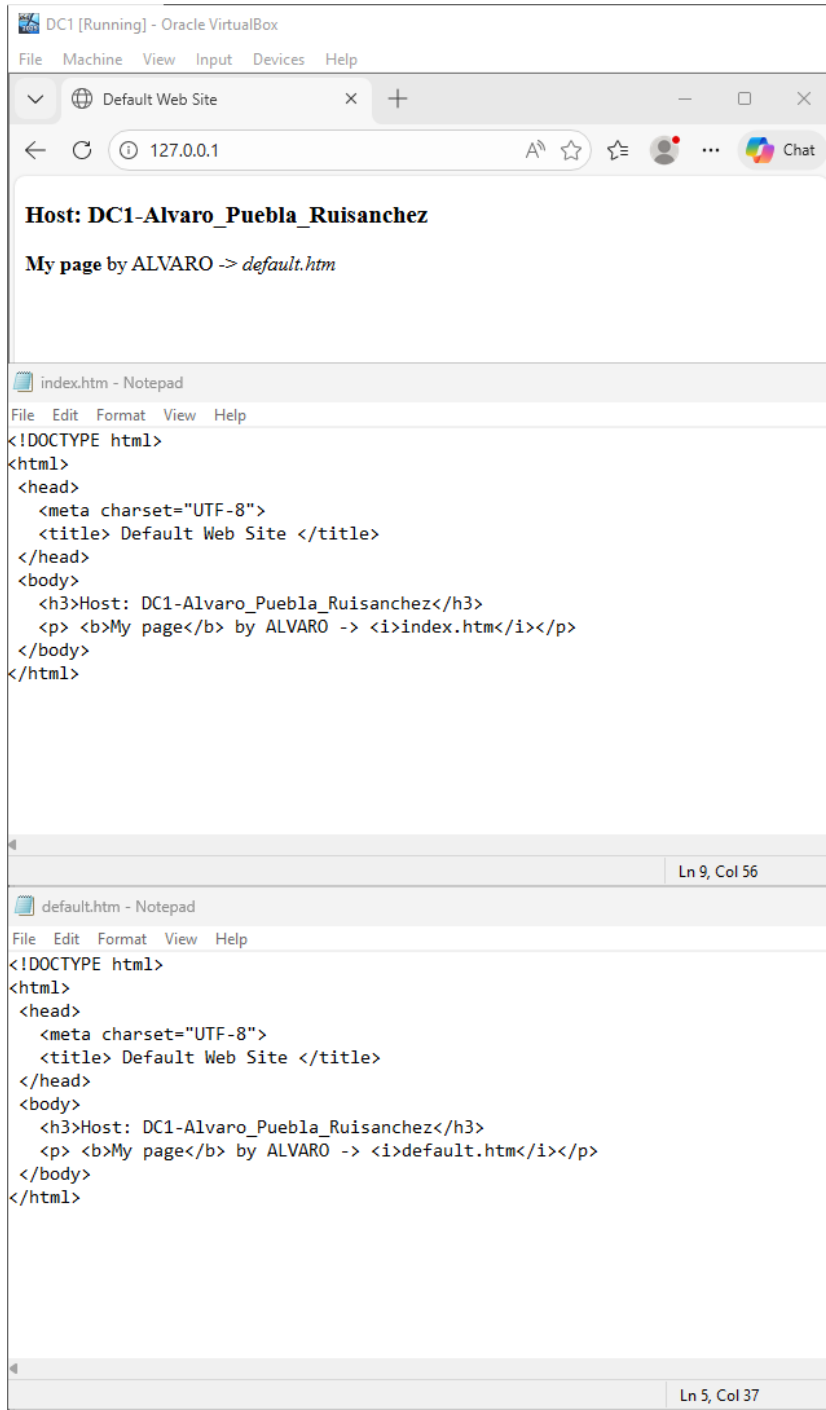

Install the latest PowerShell for new features and improvements! https://aka.ms/PSWindows

PS C:\Users\Administrator> Get-Service W3SVC
```

Status	Name	DisplayName
Running	W3SVC	World Wide Web Publishing Service

```
PS C:\Users\Administrator>
```

2: Configuration of the Default Website

DC1 [Running] - Oracle VirtualBox

File Machine View Input Devices Help

IIS 10.0 Detailed Error - 403.14 - Forbidden

127.0.0.1/subpage/ Summarize A ☆ ☆ ... Chat

HTTP Error 403.14 - Forbidden

The Web server is configured to not list the contents of this directory.

Most likely causes:

- A default document is not configured for the requested URL, and directory browsing is not enabled on the server.

Things you can try:

- If you do not want to enable directory browsing, ensure that a default document is configured and that the file exists.
- Enable directory browsing using IIS Manager.
 - Open IIS Manager.
 - In the Features view, double-click Directory Browsing.
 - On the Directory Browsing page, in the Actions pane, click Enable.
- Verify that the configuration/system.webServer/directoryBrowse@enabled attribute is set to true in the site or application configuration file.

Detailed Error Information:

Module	DirectoryListingModule	Requested URL	http://127.0.0.1:80/subpage/
Notification	ExecuteRequestHandler	Physical Path	C:\inetpub\wwwroot\subpage\
Handler	StaticFile	Logon Method	Anonymous
Error Code	0x00000000	Logon User	Anonymous

More Information:

This error occurs when a document is not specified in the URL, no default document is specified for the Web site or application, and directory listing is not enabled for the Web site or application. This setting may be disabled on purpose to secure the contents of the server.

page.htm - Notepad

File Edit Format View Help

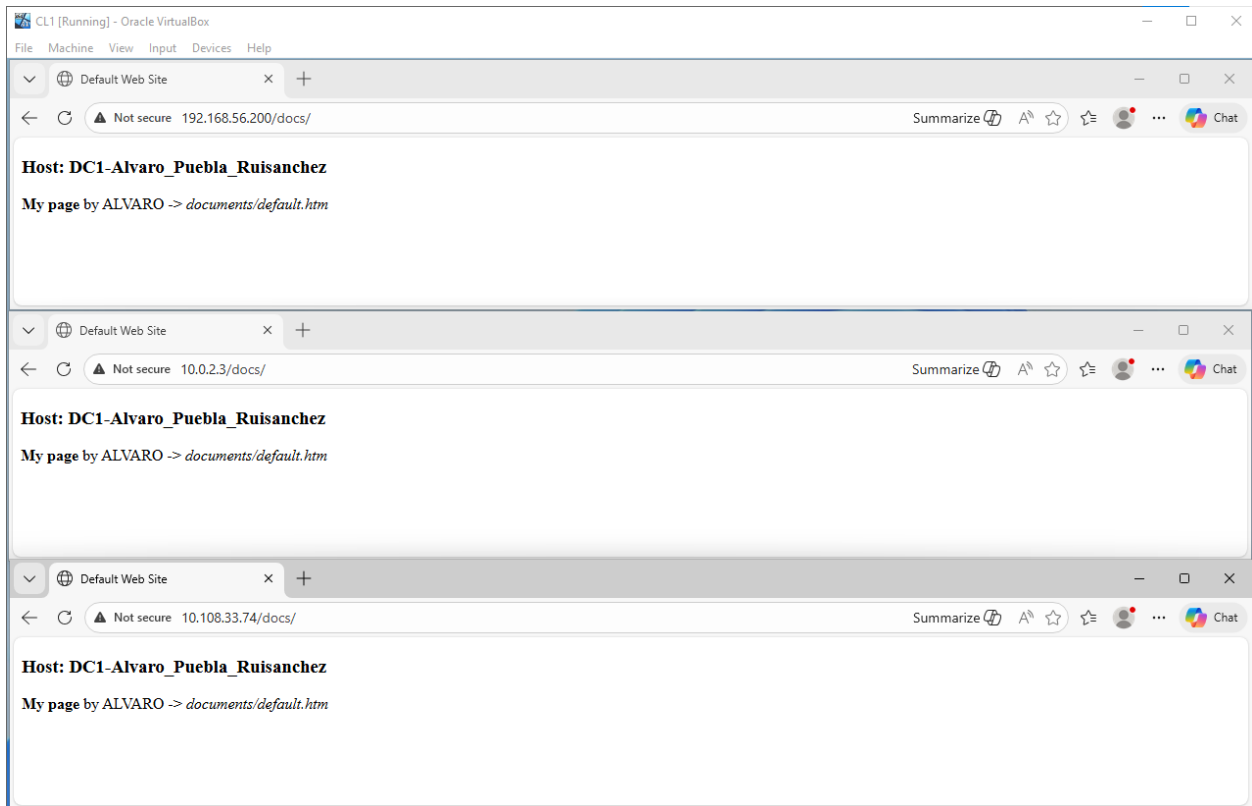

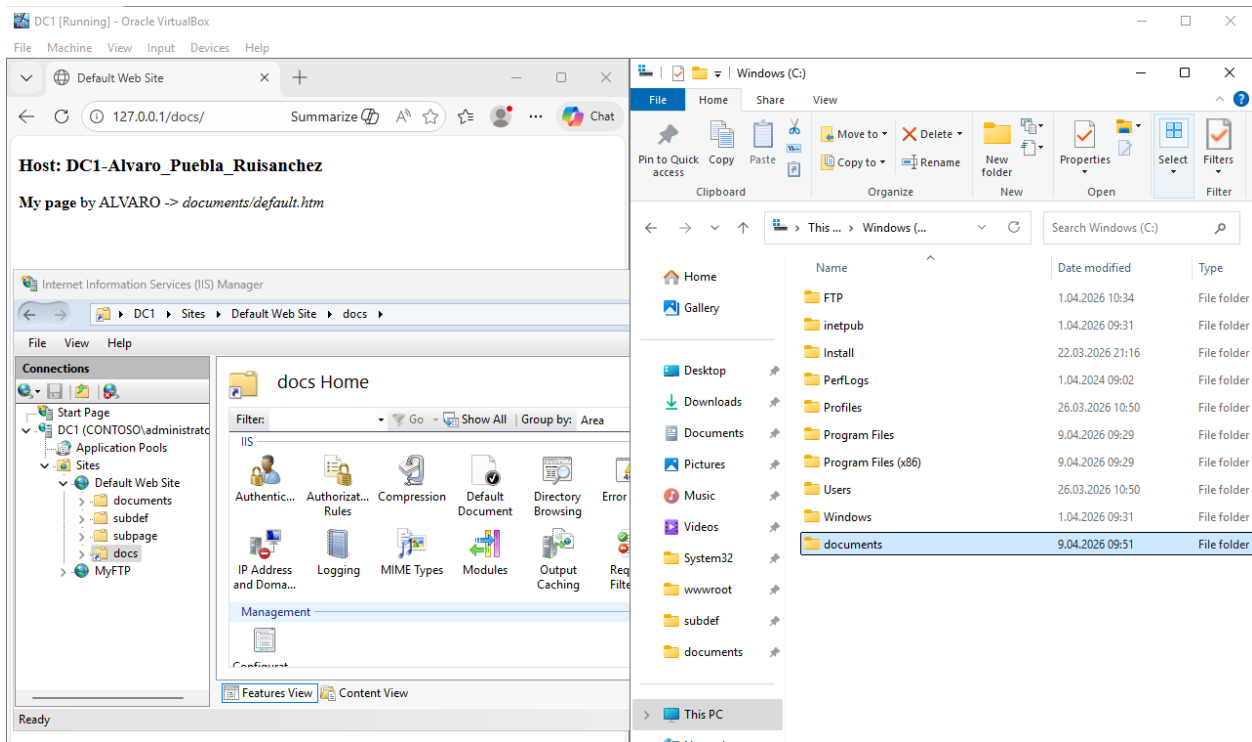

```
<!DOCTYPE html>
<html>
<head>
  <meta charset="UTF-8">
  <title> Default Web Site </title>
</head>
<body>
  <h3>Host: DC1-Alvaro_Puebla_Ruisanchez</h3>
  <p> <b>My page</b> by ALVARO -> <i>subpage/page.htm</i></p>
</body>
</html>
```

Ln 5, Col 37

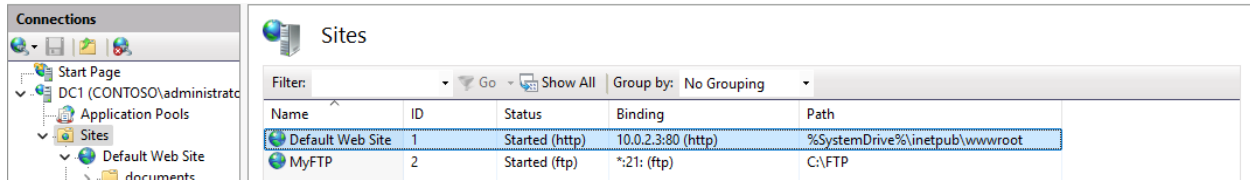

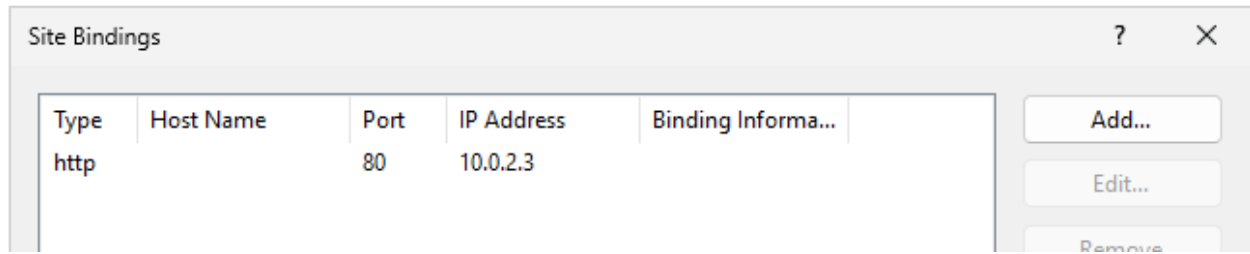

The default document priority order in IIS is:

1. default.htm
2. default.asp
3. index.htm
4. index.html
5. iisstart.htm

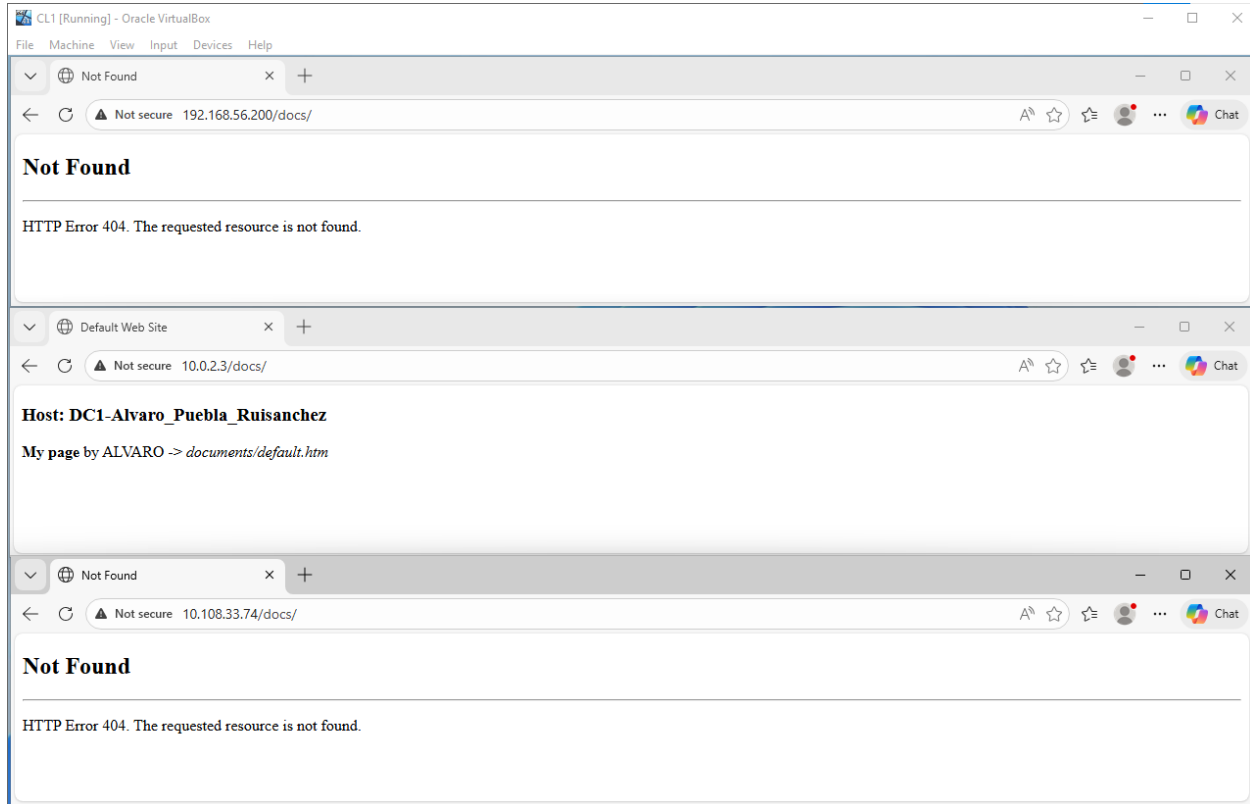

So when default.htm exists, it is served first. Once renamed to .bak, IIS skips it and falls through to index.htm.

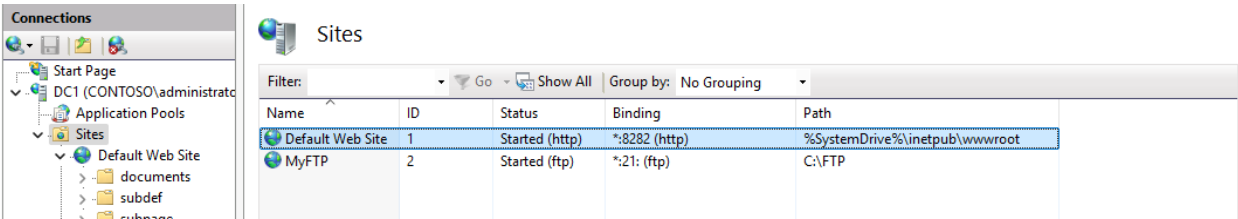

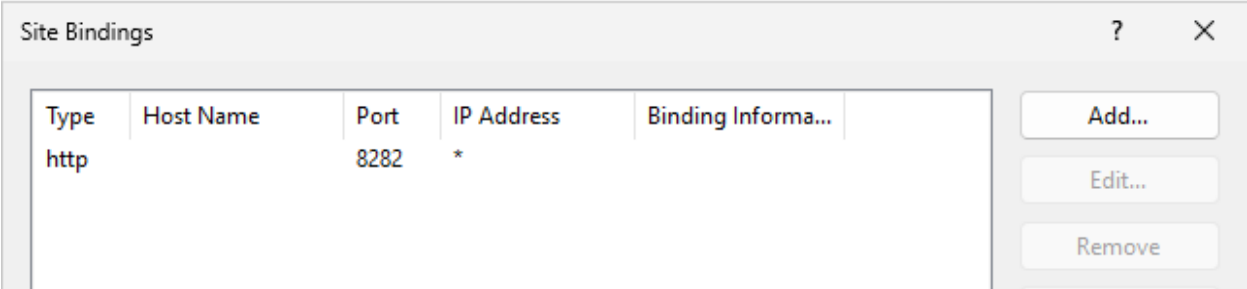

3: Configuration of Website Bindings (IP, Ports, Hosts)

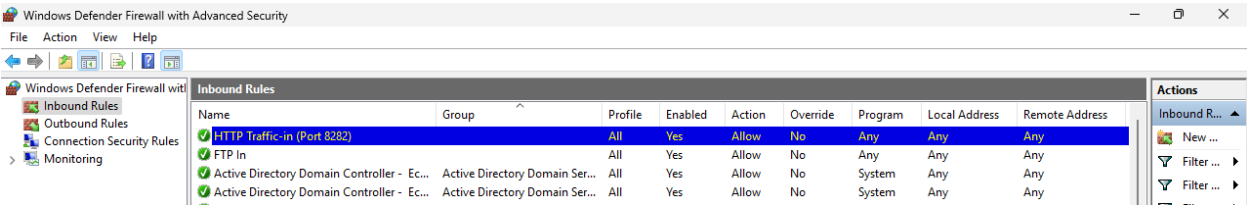

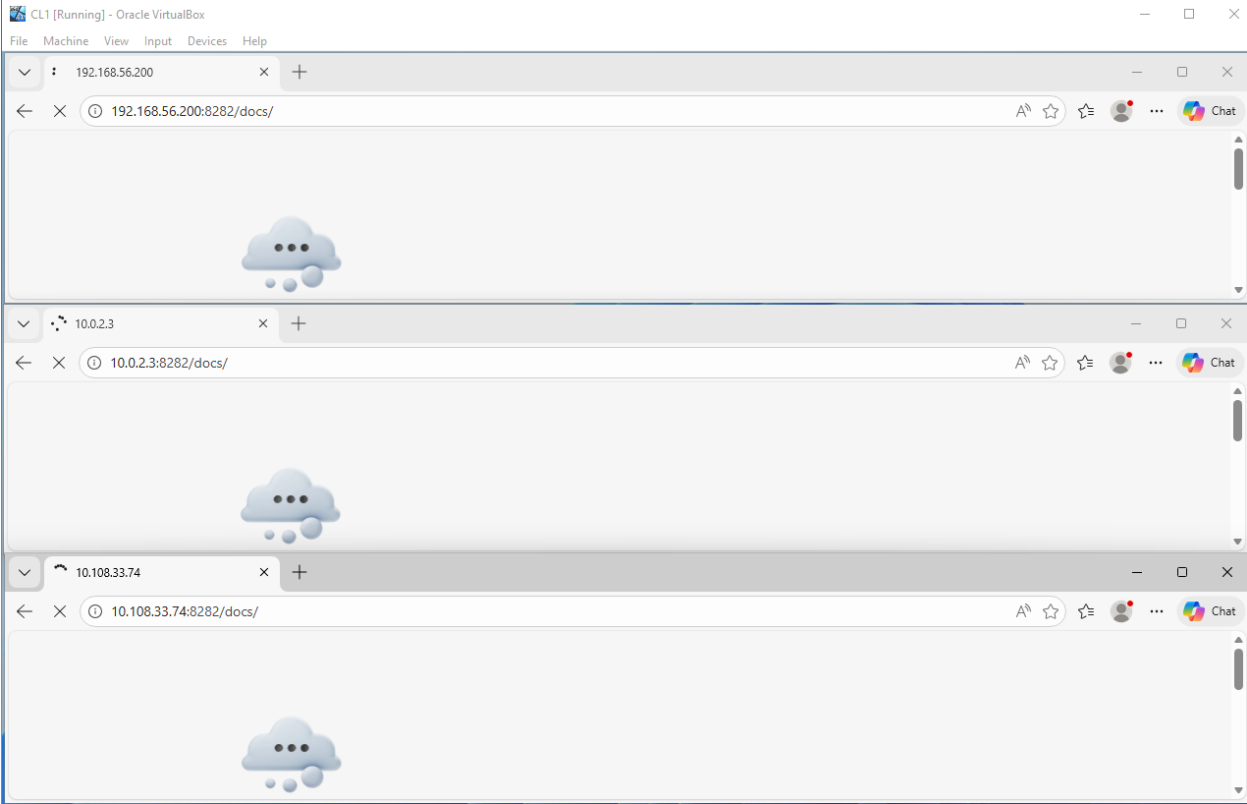

Screenshot in client:

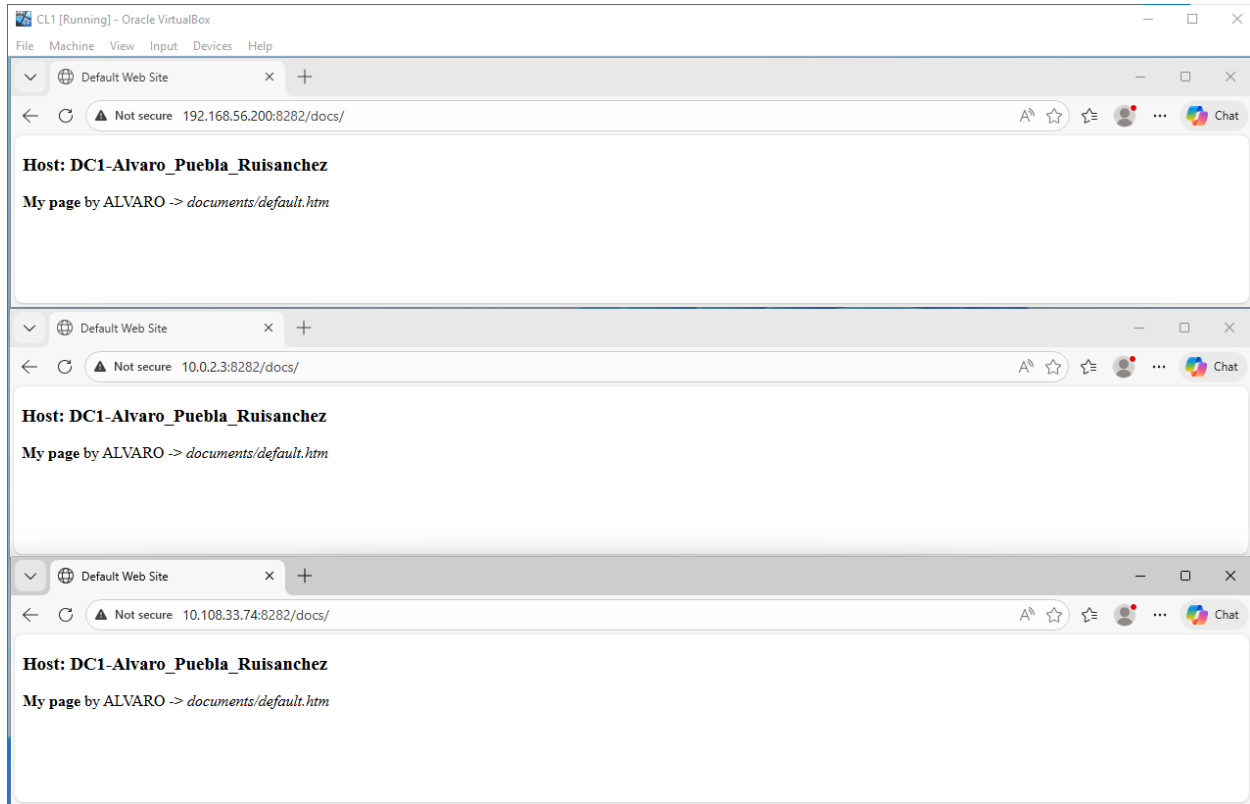

As the firewall is on:

So it finally works:

And not with the other port:
