Final test

Final test

Exam: Summer 2026

- I term:

Date: **29 June** 2026

Time: **3:15** p.m. – 3:40 p.m. (15:15 – 15:40)

- II term:

Date: **6 July** 2026

Time: **3:15** p.m. – 3:40 p.m. (15:15 – 15:40)

Rules:

- The exam will take place online.
- It will be possible to join the exam only within the first 5 minutes of its start time.
- To take the exam, you need access to the Internet, a computer and an installed web browser.
- No additional dates are planned.
- The exam result is expressed as a percentage and constitutes an element of the assessment for a group of courses, in accordance with the rules presented below.

3

Scope of the project

Scope of the project

The **scope of the IT system project** is presented in the form of a description of the *key functional areas* of the IT system aimed at indicating what is within and what is outside of it, i.e. to define the *boundaries* of its functional areas.

Scope of the project

Important issues regarding the content of the project **scope** description, i.e. what is included in the **scope** and what is not.:

- requirements specification,
- functional boundaries,
- modularity,
- high level of abstraction,
- more common a project → more concise scope.

4

Project context

Project context

The **context of the IT system project** is presented in the form of a description of the information system *environment* in which the system is to operate or in which it already functions.

Project context

Context can cover many **dimensions**:

- application,
- communication,
- technological,
- organizational,
- legal,
- etc.

Project context

Context **issues**:

- context selected individually,
- set of constraints,
- opportunities.
