

Test rules:

1. The test has on-line form, so all students must have access to the Internet.
2. The test consists of 30 questions worth max. 2 points each.
3. In most questions there is only one correct answer for the question, however some questions are multiple choice ones. So, this is a multiple choice test in general.
4. The students are not allowed to communicate with each other. Any questions should be addressed to the teacher.
5. It is not allowed to use:
 - a. lecture material
 - b. student's personal notes
 - c. external information sources including the ones available via InternetThe reason is that the questions do not have a form of problems or exercises to be solved (except two questions requiring simple calculations) but they refer to information from the lecture directly.
6. In case a student is not satisfied with the reached grade in the first attempt the student may take the second attempt to improve the grade. The grade may remain the same or may be higher only.
7. Sample questions to illustrate their typical character:

Ex1: Which document formally authorizes the existence of a project and provides the project manager with the authority to apply organizational resources to project activities?

- a) Project Charter
- b) Project Management Plan
- c) Requirements Specification
- d) Scope Management Plan

Ex2: The main purpose of this document is to validate that all requirements are checked via test cases such that no functionality is unchecked during software testing. Indicate this document:

- a) Requirements Register
- b) Requirement Traceability Matrix
- c) Software Requirements Specification
- d) Requirement Breakdown Structure
