

(Lect) Support for IT Project Management – Rules

Main rules:

1. Presence is obligatory.
2. The test takes place during the last lecture.
3. In the case of the test fail the second test date will be announced. The second test takes place before session.
4. Failing the second test is equivalent to failing the lecture (2.0 grade).
5. The test has on-line form.
6. There are 30 questions in the test worth max 2 points each.
7. The number of points for the test is normalized to the 100 points as the maximal one to form the total number of normalized points for the lecture.
8. The final number of points for the course (lecture + laboratory + seminar) is calculated as follows:

$$P(\text{subject}) = W1 \times P(\text{lect}) + W2 \times P(\text{lab}) + W3 \times P(\text{sem}),$$

where

$P(\text{lect})$ – normalized lecture points

$P(\text{lab})$ – normalized laboratory points

$P(\text{sem})$ – normalized seminar points

$W1 = 0.4$

$W2 = 0.3$

$W3 = 0.3$

9. The mapping of the points obtained during the course to the final grades for the whole subject is as follows:

min	max	grade
91	100	5.0
81	90	4.5
71	80	4.0
61	70	3.5
51	60	3.0
0	50	2.0
